# QUANTUM DB™ INTEGRATED LOGGING SOFTWARE

Quantum DB™ is a fully integrated logging suite, capable of producing professional, accurate, and complete data logs for any geological needs. It also allows users to locate historic logs and tool service information at the push of a button.

- Provides flexibility in logging presentation
- Creates oilfield standard reporting
- Allows exporting/importing of standard file types (LAS, DLIS, etc)
- Prepares survey reports and allows tracking/editing of directional surveys
- Creates BHA reports
